## **There's no such thing as okay security.**

It might sometimes seem otherwise. As if anyone can provide it, as if it comes out of a box. But security is more than an act of compliance, a box to be ticked. It's a vital part of the life of a business. It secures futures, because tomorrow won't take care of itself.

## **Our name is Sussman. Real security is our business.**

We are experts in cybersecurity, infrastructure security, physical security and KYC security. We're a different kind of security company. We fly our independence flag high. It means we never have to abandon our principles. We put our faith in our people, experts who share those principles. Together we do the hard work, the thorough work.

## **We want to help repair the world by making businesses more secure**

We're realists. We know we can't solve all the world's problems but we can provide security solutions that help make the world a more secure place.

Because that's what happens when the world knows it has businesses it can depend on to protect the trust and safety of their customers, employees and shareholders.

## **Security is about telling you the truth.**

Simple words, cleansed of extravagance. We live by them because we can. It's the kind of firm we've built. We never forget that when securing your business assets whether you win or lose does matter. It's real. It's why we act is if there is no such thing as luck, no okay security. Only integrity and guts.

**This is not a game.**
